# The shop is here; contact remains.

We still work with living  
products, so stay in touch  
with us.

## Still keep in mind:

### Transport

- All prices in the shop are excluding VAT and transportation. Flowers and plants are living items and need to be transported with care to maintain quality. Therefore, in almost all cases, it is necessary to ship our products per pallet, even for low quantities.

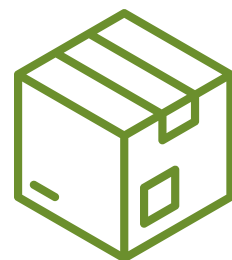

### Timeline

- When your customer wants to give a beautiful green gift, it's important to consider the timeline for this. For example, plants cannot remain in a box for an extended period. We can work together to find the best option; for instance, we can arrange partial deliveries.

### Delivery time

- Many products can be delivered very quickly, even within a few working days if desired. We aim to adhere to the production time stated in our shop, but we don't have a warehouse full of plants. If you want to be absolutely sure if a product is available, please contact us.

### Individual shipment

- Not all plants are suitable for individual shipping due to factors such as temperature and fragility. Ask us for advice on which plants are suitable for individual shipping. Also, consider additional costs.
